

Ways

While I became a little absurd
I moved a bit but did not change my ways
But changing them is clearly most essential
(Though “essence” is a problematic term)

So my views became a little eccentric
You tried and tried but did not grasp their meaning
And meaning is the key to everything
(But first you have to learn about the ways)

*An unexpected theory
A guiding light for you and me
We tried to move in circles
Just to move another way
See, dear, our lives are circles too
We tried to think in circles
Just to think a brandnew way
See, dear, our lives are circles too*

We: confused, depressed, incompetent
A multiplicity of malfunctions
Let’s analyse those underlying concepts
(But first we have to learn about the ways)
